

About the Sheridan Landfill

The Sheridan Landfill provides a place for the public of Sheridan to dispose of their unwanted items. The landfill accepts household trash, construction debris, compost material, brush, tires, used oil, metal and clean concrete and asphalt. The facility also provides recycling activities for many of these items.

What We Do Each Year

- Grind an average of 1,000-1,500 tons of brush
- Bail and ship approximately 1,750 tons of scrap metal to recycling center
- Ship approximately 2,400 (36.9 tons) of tires to recycling center
- Compact and cover approximately 30,000 tons of household waste and construction debris

What to Expect During Your Landfill Visit

During your visit to the landfill, please follow the gate attendant's instructions, observe the speed limit and obey all traffic control lights. Please do not smoke while on site. Please observe all signage and yield to all equipment and landfill personnel.

Secured Load Ordinance

By City ordinance, all loads entering the landfill must be secured in such a manner that none of the load escapes the vehicle during transport. Examples of ways to secure loads include: rope, bungees, tie downs, tarps or cargo nets. For instance, a pickup carrying loose leaves in the bed would require a tarp and rope to be considered secure. Violation of the secured load ordinance will result in a \$10 per load fee for pickups and small trailers and a \$50 per load fee for large vehicles and large trailers.

Landfill Fees

General Refuse	\$93/ton
Concrete	\$18/ton
Pallets	\$18/ton
